

Distributors Increase Productivity with Networkcar for Business

In the distribution business, it is critical for companies to employ effective yet affordable tools for logistics planning. Networkcar for Business increases the productivity of your assets by enabling you to view your fleet's location, diagnostic status and operational summaries 24/7.

Improve customer response time

- Access start and stop reports to review the amount of time spent with your most important customers and to ensure timely deliveries.
- Review speed and mileage reports to reduce overtime, and ensure the accuracy of reported work hours and mileage logs.

Streamline vehicle routing

- Maximize routing by quickly accessing GPS mapping to view which technician/driver is nearest to the location.
- Analyze historical driving patterns to optimize routes.

Increase vehicle uptime

- Reduce the likelihood of breakdowns through immediate problem detection alerts and scheduled maintenance reminders.
- Decrease speeding and associated accidents because drivers know you have access to their speed information.

Networkcar Helps Arcade Supplier Meet Budgetary Goals.

Company:
Dandy Amusements
International

Distributor of
arcade equipment

Location(s):
Mission Hills, CA

For Dandy Amusements International, the decision to use Networkcar in their vehicles was an easy one. Networkcar provides all the same features as its competitors, and offers it at a lower price. For Controller Jim Rogers, staying within budgetary constraints is a critical part of day to day decision making. "The advantage of Networkcar over other

GPS systems, is the significant savings on both installation and monthly fees," said Rogers.

Dandy Amusements International has found Networkcar to be an overall best buy in that Networkcar's system provides both diagnostic information on their

trucks and tracking information to help them route drivers more efficiently. "We have proven after installing Networkcar on our vehicles, that it absolutely does everything the highest priced systems claim to do," said Rogers.

"The advantage of Networkcar over other GPS systems is the significant savings..."

X-Ray Distributor Increases Driver Productivity.

Company:
Merry X-Ray Corp.

Distributor of
x-ray equipment
and supplies

Location(s):
Nationwide

After only 3 months, Merry X-Ray, has experienced first hand how Networkcar can increase business efficiency. Alan Lewin, Vice President said, "At first, we piloted Networkcar's system to measure how much it would impact our business. As predicted, Networkcar helped us dispatch our service technicians more efficiently since we know where our vehicles are

at all times. I would recommend Networkcar to any business who wants to ensure that drivers are doing what they have been scheduled to do each day." Networkcar's historical vehicle location feature allows business owners to view where each vehicle has been, the vehicle's speed, and how long the vehicle stopped at each location.

"I would recommend Networkcar to any business ..."

"With the great results we've seen, we are outfitting even more of our vehicles with Networkcar," said Lewin. Networkcar's pilot program is an easy way to try a GPS system with little risk. Over 99% of businesses who try Networkcar decide to outfit the rest of their vehicles.
